## **Arturo García Aymerich**

President & CEO

**Minera Triuno, S. de R.L. de C.V.**

Mr. García Aymerich is a Certified Public Accountant with more than 12 year involved in mining activities, with a background in management and finance. He is a graduate from Kennesaw State University in Georgia with a Master in Business Administration and a Master of Accounting. He also graduated from the Instituto Tecnológico de Estudios Superiores de Monterrey with a Master of Finance. On October 2018, Mr. García attended a Seminar on Negotiation and Leadership at Harvard University at Cambridge, MA.

Since 2007, Mr. García has been VP of Administration and Finance on Mexican operations for two Canadian Junior Public Companies listed on the TSX-V (UC Resources and First Mexican Gold Corp). UC Resources operated a 200TPD ball mill for processing tailings containing gold and silver in Nayarit. Both, UC and FMG ran exploration programs on their properties including geophysics, reverse circulation and diamond drilling.

Mr. García was responsible for the regulatory filings associated with property claims in Mexico, ensuring correct compliance with all mining laws and regulations including legal, environmental, labor, tax, migration, health and security. He was responsible for reporting operations and financial performance to the Board of Directors, filing financial reports for the stock exchange, management of cash and working capital and fund raising. Mr. García performed due diligence on Joint Ventures, Confidentiality Agreements, Letters of Intent and 43-101 Reports. He also managed relations with communities, business chambers and governments. And he ensured that correct procedures were followed for selling mineral products.

From 2014 to 2016, Mr. García has served as a consultant for Canadian Junior mining companies and from 2017 to date, he has served as President & CEO of Minera Triuno, S. de R.L. de C.V. leading the development of a gold and silver exploration project in La Yesca, Nayarit. He is a member of CAMIMEX, CANCHAM, AIMMGM, among other associations.

### ***“La Xora Project, Nayarit”***

La Xora is a 600-hectare gold and silver property located in La Yesca, Nayarit. It has substantial merit as a potential setting for epithermal gold and silver deposits.

La Xora is within the Sierra Madre Occidental physiographic province that comprises the volcanic arc of ignimbrites. Mining activity in the district dates back to the 1580's.

La Yesca is located 160km NW from Guadalajara Jalisco (3:30hs driving time). The property is surrounded by Fresnillo PLC claims. It has a very good infrastructure and all services that make it a very suitable place to run any mining project. The property also has a 200 TPD cyanide mill for processing tailings that operated until 2013.

La Xora consists of epithermal Au-Ag bearing quartz veins averaging 2.44 meters wide generally trending East to West. The length of mineralized outcrops in the main exploration zone is around 1,500 meters. Areas with thickness of 10 meters are detected with grades up to 1.96 g/t Au with 865 g/t Ag in La Colorada mine and 4 g/t across a thickness of 2.8 meters at La Coral mine. In addition, samples have returned grades as high as 6.60 g/t Au and over 2,000 g/t Ag.

A 1,113m DDP showed highly mineralized intersections, vertical veins of 2.50 to 6 meters wide, with average gold equivalent of 3.50 g/t over 200 meters along strike, including samples running 1 to 9.6 g/t equivalent gold, plus an isolated half meter of 56 g/t gold equivalent.

The estimated resource has been projected to be more than 1.2M tons of mineralized rock, averaging 1.72 g/t Au and 248 g/t Ag containing 187,000 Oz Au Eq in at least 3 different known structures.
