Naresh Singh

Country Manager

IMR Bonanza, S.A. de C.V.

Naresh Singh, originally from Rajasthan, India, studied the career of Mining Engineering at one of the most prestigious universities of India, IIT-BHU (2006-2010), having ten years of experience in coal, iron ore and gold mining, started as a Project Engineer achieving to date as a Country Manager. He formed and developed the Mexican subsidiary of IMR, a global trading and mining company (www.imr-resources.com), with rapid growth in precious metals extraction, obtaining the first dore in one year, in a cost-effective way through the formation and integration of a high-performance work team along with the acquisition and development of a potential gold mining project, La Perla mine complex.

The experience gained allows him to be a developer of profitable, socially and environmentally sustainable mining projects, oriented to obtain results, establishing mutually beneficial relationships with partners, always considering the importance of constant learning as he is currently pursuing the Executive MBA at the Jack Welch Management Institute, which allows him to strengthen the skills of leadership.

Currently, since 2015, he holds the position of Country Manager and of IMR Bonanza, S.A. de C.V., where he is responsible for coordinating all activities in Mexico related to the administration and business development as well as managing the acquisition of new projects, informing the executives, through the forecasts of business performance, including all aspects related to La Perla mine complex and Tarachi project Sonora, Mexico.

From 2011 to 2015 he was the Mine Manager at the Doña Paula iron ore mine in Michoacán, Mexico, owned by IMR Metallurgical Resources Mexico, S.A. de C.V, being responsible for the management of mineral resources and assets, informing the Country Manager about the planning, execution and monitoring of the mine, providing information for strategic decisions through annual budgets, always guaranteeing the safety and health of the personnel and ensuring the implementation of the Environmental Plan, and engaging with the communities around the project.

"IMR Bonanza: Boosting Small and Medium-sized Mining by Operating Mines and Providing Processing Services for Gold-Silver Mines"

Two significant challenges, among others faced by small and medium-sized miners in Mexico, are minimal availability of financing services and the lack of potential local buyers for their products and sub-products. IMR Bonanza, a mining company and subsidiary of IMR Holding Ag, is best positioned to develop and promote the small and medium-size mining industry in Mexico by investing in and operating its La Perla and Tarachi projects in Sonora and providing processing and refining services in Hermosillo, Sonora for gold and silver-loaded carbon produced from cyanide leached ore.

Services including the processing of loaded carbon, purchasing of dore, financing mining operations and providing technical assistance by our experienced metallurgists, safe and secure transportation of loaded carbon, and completely transparent transactions through the involvement of clients' personnel at every step, separate IMR Bonanza from others parties in the market.

Short-term plans include supplying new activated-carbon for gold recovery, carbon regeneration, and metal extraction from carbon fines or waste. A separate branch of the company focusing on the procurement of polymetallic concentrates from small and medium-size miners is also currently under development.
